Contract BA-1929

2. The services and equipment being procured by this Contract No. BA-1929 are in furtherance of the IDEALIST

Program(s), the nature of which cannot be publicly disclosed for security reasons. The undersigned Contracting Officer therefore determines that this procurement must be accomplished by negotiations pursuant to the authority of Section 3(a) of PL 81-110 and Class Determination and Finding, OXC-2122, signed by the DDCI on 15 October 1961.

3. Certification of funds for this contract will be handled under the procedure approved by the Director of Central Intelligence on 15 December 1956 which, in effect, results in all covert expenses involving issuance of Treasury Checks being accumulated in a separate account within the Finance Division. The amounts in this account will be periodically scheduled for certification of the vouchers by the Director. This procedure eliminates the necessity for a separate certification of authority under Section 8(b) of Public Law 110, 81st Congress (formerly 10(b) - see 35-507 dated 7/7/58) for each contract.

4. The following comments describe the procurement hereby effected, the terms and provisions generally of this contract/amendment, and a resume of major issues negotiated:

25X1A This contract calls for the modernization and standardization of all project sextants at a level of improved accuracy and reliability. The Contractor submitted a proposed overhead of [REDACTED] with G & A ~~XXXXXXXXXX~~ at [REDACTED]. At the time of negotiation, 25X1A with an on site review by the area auditor, the latest approved labor rates were used with [REDACTED] overhead and [REDACTED] G & A resulting 25X1A in a slight decrease in unit prices. The Contractor was able to justify quite adequately his proposed material costs and to a lesser extent his proposed labor hours based on similar experience encountered on the T & M and Call Contracts. Some questions as to the proposed disassembly time arose and this was reduced. The Contractor has requested that the equipment be shipped on work orders under the T & M Contract so that ordinary essential repairs and adjustments not included in this contract might be effected to insure completely operative instruments. The practicality of this approach is of course as evident as the serious questions of propriety that arise in adopting this form of procedure. The depot and Contracts Division as well as the cognizant auditor will be made aware of the provisions of both contracts and the proper application of costs.
